

Editorial

Dear Readers,

It gives me immense pleasure to announce that the Journal of Gastrointestinal Infections, the official publication of the Gastrointestinal Infection Society of India, has been assigned to M/s Jaypee Brothers Medical Publishers, New Delhi, for publishing and distributing the journal worldwide, both in print and electronic media. Every issue of the journal will be hosted online at www.jaypeejournals.com by the Publishers.

The Journal of Gastrointestinal Infections is a double blind, and at times triple-blind peer-reviewed indexed journal being published since 2011 annually. The frequency of publication could be increased in future. The Journal aims at ensuring effective communication of research in various aspects of gastrointestinal (GI) infections and providing continuing medical education, where concepts and strategies for managing critical patients are evolving rapidly. The Journal of Gastrointestinal Infections is devoted to the dissemination of new knowledge concerning the various aspects of human infections and infestations associated with GI tract and will cover studies related to GI infections from all over the world. The journal will publish peer-reviewed original research papers, case reports, systematic reviews, meta-analysis, research scan as well as letters to editor. The journal will also regularly publish Review articles, Special Articles or Guest Editorials on various topics in GI infections, accepted upon invitation.

Chetana Vaishnavi

Editor-in-Chief
