

Editorial

It is that time of year again friends, when we have to announce our biannual conference. This time the city is our capital, New Delhi. So, friends be prepared to have fun-filled learning experiences from 10th to 13th of September.

We have now new evidence that diode lasers are very effective in the release of neonatal tongue tie. Pediatric dentists are going to be really happy with this development, more weapons for their technological arsenal.

So, the laser has become an invaluable companion in all the branches of dentistry and the invasion continues.
