# MGM Journal of Medical Sciences

## 1. Aims and Scope

MGM Institute of Health Sciences (Deemed University u/s 3 of UGC Act 1956) is committed to promote excellence in medical education and research finding better, safer and affordable ways of diagnosing, treating and preventing diseases. With this view in mind, the university has launched a quarterly peer-reviewed scientific journal "MGM Journal of Medical Sciences" in 2014. It publishes original research papers, review articles, interesting case reports, pictorial reviews, letters to editor, book reviews and notices of important professional meetings and conferences. All submitted articles are scrutinized by peer-reviewers and the editorial team, before being published. From time to time, this journal may bring out special issues focusing on specific themes. A section may also be devoted exclusively to young researchers and students to stimulate their innovative and creative ideas.

## 2. Ethical Considerations

Manuscripts submitted for publication must comply with the following ethical considerations:

### **Informed Consent**

Informed consent of the patients must be taken before they are considered for participation in the study. Patient identifying information, such as names, initials, hospital numbers or photographs should not be included in the written descriptions. Patient consent should be obtained in written and archived with the authors.

### **Protection of Human Subjects and Animals in Research**

When conducting experiments on human subjects, appropriate approval must have been obtained by the relevant ethics committees. All the procedures must be performed in accordance with the ethical standards of the responsible ethics committee both (institutional and national) on human experimentation and the Helsinki Declaration of 1964 (as revised in 2008). When reporting experiments on animals, authors must follow the institutional

and national guidelines for the care and use of laboratory animals.

## 3. Copyright

Following guidelines must be followed before submission of the manuscript:

The articles must represent original research material, should not have been published before, and should not be under consideration of publication elsewhere. This, however, does not include previous publication in form of an abstract or as part of published literature (review or thesis). It is the duty of the author to obtain the necessary permissions for extensive quotations, tables, illustrations or any other copyrighted material they are using in the paper before a paper can be considered for publication. Copyright of the article gets transferred to Jaypee Brothers Medical Publishers Pvt Ltd., once the article has been accepted for publication. The author would be asked to sign the "Copyright Transfer Form" before his/her article is considered for publication. Once the Copyright Transfer statement has been signed by the corresponding author, no change in authorship or in the order of the authors listed on the article would be accepted by Jaypee Brothers Medical Publishers Pvt Ltd. Also by signing the above-mentioned form, the author reassigns the rights of copublishing, or translation if considered necessary in future to the publisher. In the advent of occurrence of any dispute, the matter would be resolved within the jurisdiction of New Delhi court.

While all care has been taken to provide accurate and correct information in accordance with the date of publication, neither the authors/editors nor the publisher takes any legal responsibility for any unintentional omission or error. The publisher makes no expressed or implied warranty with respect to the information contained herein. The published material cannot be photocopied for the following purposes: General distribution, promotion, new works or resale. If this is required, specific written permission requires to be obtained from the publisher. Exclusive rights to reproduce and distribute the articles in this journal have been protected by copyright. This also covers the rights to reproduce or distribute the article as well as the translation rights. No material published in this journal can be reproduced in digital format or stored in form of electronic databases, video disks, etc.

Both the conflict of interests and financial disclosure needs to be handled well while conducting the research study. Disclosure of such relationships is also important in connection with all articles submitted for publication. Both of these have also been included in the copyright transfer form. Authors should give due acknowledgment to the individuals who provide writing or other assistance while conducting the research study and also disclose the funding source for the research study.
