Journal of Operative Dentistry & Endodontology

An Official Publication of Conservative Dentistry & Endodontics Association of Tamil Nadu (CEAT)

www.jaypeebrothers.com
www.jaypeejournals.com
Journal of Operative Dentistry & Endodontics

1. Aims and Scope
To publish a literature that epitomizes the diversity in the specialty of conservative dentistry and endodontics and reflects the clinical skills, innovation and inception of ideas thereby serving as a source of comprehensive knowledge.

The scope of the journal encompasses articles related to case reports, case series, reviews, scientific articles and research papers in the fields of conservative dentistry, endodontics and dental materials.

2. Objectives
The Journal of Operative Dentistry and Endodontics (JODE) is published biannually and strives to publish original articles of the highest quality to disseminate scientific and clinical knowledge. All manuscripts are subjected to peer-review. Original scientific articles, case reports, case series and review articles are published in the areas of applied materials science, bioengineering, epidemiology and social science relevant to operative dentistry and endodontics.

3. Ethical Considerations
Manuscripts submitted for publication must comply with the following ethical considerations:

Informed Consent
Informed consent of the patients must be taken before they are considered for participation in the study. Patient identifying information, such as names, initials, hospital numbers, or photographs should not be included in the written descriptions. Patient consent should be obtained in written and archived with the authors.

Protection of Human Subjects and Animals in Research
When conducting experiments on human subjects, appropriate approval must have been obtained by the relevant ethics committees. All the procedures must be performed in accordance with the ethical standards of the responsible ethics committee both (institutional and national) on human experimentation and the Helsinki Declaration of 1964 (as revised in 2008). When reporting experiments on animals, authors must follow the institutional and national guidelines for the care and use of laboratory animals.

4. Copyright
Following guidelines must be followed before submission of the manuscript:

The articles must represent original research material, should not have been published before, and should not be under consideration of publication elsewhere. This, however, does not include previous publication in form of an abstract or as part of published literature (review or thesis). It is the duty of the author to obtain the necessary permissions for extensive quotations, tables, illustrations or any other copyrighted material they are using in the paper before a paper can be considered for publication. Copyright of the article gets transferred to Jaypee Brothers Medical Publishers (P) Ltd., once the article has been accepted for publication. The author would be asked to sign the “Copyright Transfer Form” before his/her article is considered for publication. Once the Copyright Transfer statement has been signed by the corresponding author, no change in authorship or in the order of the authors listed on the article would be accepted by Jaypee Brothers Medical Publishers (P) Ltd. Also by signing the above-mentioned form, the author reassigns the rights of copublishing, or translation if considered necessary in future to the publisher. In the advent of occurrence of any dispute, the matter would be resolved within the jurisdiction of New Delhi court.

While all care has been taken to provide accurate and correct information in accordance with the date of publication, neither the authors/editors nor the publisher takes any legal responsibility for any unintentional omission or error. The publisher makes no expressed or implied warranty with respect to the information contained herein. The published material cannot be photocopied for the following purposes: general distribution, promotion, new works or resale. If this is required, specific written permission requires to be obtained from the publisher. Exclusive rights to reproduce and distribute the articles in this journal have been protected by copyright. This also covers the rights to reproduce or distribute the article as well as the translation rights. No material published in this journal can be reproduced in digital format or stored in form of electronic databases, video disks, etc.

Both the conflict of interests and financial disclosure needs to be handled well while conducting the research study. Disclosure of such relationships is also important in connection with all articles submitted for publication. Both of these have also been included in the copyright transfer form. Authors should give due acknowledgment to the individuals who provide writing or other assistance while conducting the research study and also disclose the funding source for the research study.
